Can manufacturer

PROJECT BACKGROUND

Brandenburg was retained by American National Can, Inc. to decontaminate and demolish the 500,000 square foot facility.

SCOPE OF WORK

Decontaminate, remediate, and demolish former can manufacturing plant

Identify, analyze, and characterize RCRA and special wastes

Perform asbestos abatement, RCRA hazardous waste remediation and stabilization, drum identification and management, labpacks, freon removal/recycling, ferrous and non-ferrous metal recycling

Conduct sampling and statistical analysis to demonstrate nonhazardous classification of wood block resulting in a \$500,000 cost reduction to customer

Develop stormwater management protocol and perform associated sampling, analysis, and discharge
